

# ATS™ 301 LINE GENERATOR SWITCH

## Safety and Convenience in a Versatile Package

**Mounts as either deck-mount  
or directly onto the back of  
Parallax power centers and  
distribution panels.**

**New levels of versatility and performance.  
For 30-amp, 120-volt electrical systems.**

ATS™ Line Generator Switches are the most trusted ways to transfer power between shoreline and RV generator. Now, the new ATS™ 301 Line Generator Switch makes power transfer more convenient and reliable than ever.

ATS 301 can be mounted anywhere and hook-up is simple through the use of terminals rather than wire nuts. The compact size of 6" x 4-1/8" x 4-7/16" fits in with any floorplan or cut-out area. The product is constructed with a rugged steel housing, yet weighs only 3.5 pounds.

ATS 301 features reliable printed circuit board construction, electronic generator time delay and chatter-free contact operation under low line voltage conditions. Parallax' attention to detail provides efficient energy transfer and long product life. ATS 301 meets or exceeds listing requirements for use in an RV.
